Company Experience & Background

Livares has provided Information Technology consulting with custom software, mobile application and web application development services to a diverse group of clients, including MNCs, state and local governments throughout the world. The projects included in domains like Information Systems, E-Commerce solutions, IoT Solutions, Embedded Systems, Big Data analytics, Augmented Reality, Virtual Reality, Mixed Reality etc. Our office is located in Technopark, Thiruvananthapuram; one of the largest technology park in India. Now we are scaling up globally by making our presence in Middle East on Sharjah Airport Free zone.

We believe that our team, solution, and approach are unequalled in the marketplace compared with our similar peers. Our proposed project team has focused on consulting, designing, developing, deploying, and supporting high-end applications over the past 8 years. Our core team members have designed and developed websites and applications for many organizations such as: Shelter Luv- Adoption Shelter Solutions, Ashok Leyland Nigeria- Leading Heavy Vehicle Manufacturing Company, Kerala Startup Mission – A startup, entrepreneurship and innovation promoting nodal agency of Kerala Government, Kerala State IT Mission- An autonomous organization under IT Ministry of Kerala Government, Travancore Holidays – A Travels Company, ICT Academy of Kerala- An institution providing industry oriented training to academic institutions, TMR Base- Mobile Analytics Platform for conducting surveys similar to survey monkey, Metro360- Online Handyman Booking Service, Thomson Business Group- A group of companies having business in a variety of domains, Kerala state Electricity Board – Main Power generation and distribution agency under Government of Kerala etc. Our team understands the web, its complexities, and the solutions required to meet our clients' needs.

Our expertise is in providing solution-oriented technologies. Which includes Mobile application and a cloud based application platform, which can be integrated with already existing third party applications. Our managers are well experienced to understand the functional requirements and they are good at creating applications matching the customer's existing process models. Thus they ensure smooth migration of any business process in to new systems. Apart from functional requirements they also study current system and suggest best suitable strategies to implement new systems matching with your key requirements and budget in a balanced way.

Livares is confident that our solution will meet the short and long term needs of our customers. The following pages detail how we will meet each of your listed technical and functional requirements, the processes that we will follow to ensure the successful delivery of your solution, our work portfolio's, major clients and some references from very important personalities from the domain.

Company Capabilities & Outsourcing

The services we provide to our customers span a wide range of Information Technology capabilities including:

- Mobile/Cloud Application Development
- Oracle HCM Cloud Implementation Consulting and Assistance
- Dynamic Content Management Web Site Design and Development
- Ecommerce
- IoT Services
- AR and VR Applications
- Big Data Analytics

Livares team has been in pace and have expertise in developing mobile application for iPhone, Android. Extended use of wireless data sharing has encouraged us to get involved in development of apps in these outstanding platforms. We always realize the importance to look for more resources that will help make the technology even more cutting edge. We specialize in developing apps that deliver content to the user while taking advantage of the power of a mobile device.

Livares has implemented multiple client-facing and internal operational web based applications including: service portals, content management and assessment software (CAS), Analytics Platform, education and learning platform, and electronic shopping cart web-based solutions for companies using PHP and Java based technologies, Java, PHP and Drupal. We are having standard practices to enhance our technical team's skills up to date with the technology so that our customers will be always delivered with the best possible technology matching with their budgets.

Livares is also having a creative design team of graphical designers. While in solution development design phase, we typically engage our graphical designers from a pool of resources to quickly define and create a visual design that will elaborate customer's requirements.

Livares have well experienced engineers trained from Prestashop's core team to develop and manage any type of online e-commerce applications matching customer's business process. Our functional team has the expertise to explain the technology possibilities to enhance client's business.

Our Oracle Global HCM Cloud implementation and support team has certified professionals to give you the best support for implementing and customizing Oracle Global HCM Cloud application for all kind of organizations.

Our Oracle Global HCM Cloud implementation and support team has certified professionals to give you the best support for implementing and customizing Oracle Global HCM Cloud application for all kind of organizations.

Our in-house research team always focuses on new technologies getting popularized in the Industry. We conduct regular sessions for updating the knowledge of our engineering and operations team. This approach enabled us to build teams on various technologies like IoT, Big Data, Virtual Reality, Augmented Reality, Mixed Reality and Real-time communication systems etc.

We follow a QA guideline with a standard set of features as a default requirement. This set of features is also updated on a regular basis. Our standard set of features ensures that all our products are released with a benchmark of minimum standard, in which the normal customers always expect from applications. These set of guidelines are prepared by analyzing the widely using applications in the market. Our QA approach also ensures that the applications are delivered with highest quality. We plan our QA in a way that our applications are tested with all possible cases.
